3.	<p>As per your specification you have desired nylon fabric with PVC coating which is a highly impractical combination.</p> <p>You must understand first of all that PVC is not all a skin friendly coating and doing so heavy coating of nylon fabric is just increasing the weight of garment which has no logic.</p> <p>The coating on raincoat should always be of P.U. may it be on nylon or polyester fabric for high quality nylon with P.U. shall be recommended and for economy version polyester with P.U. may be recommended.</p> <p>The present price on which you are buying this specification appears impossible.</p> <p>Would you kindly do necessary exercise with experts before going into this purchase of raincoat and do necessary amendment is specification.</p>	Bid Conditions confirmed.
